

APPENDIX A – 2003 DNA TEST RESULTS

The 2003 DNA test results of the forensic evidence samples matched the DNA profiles of the victim, the victim's husband, John Doe (the victim's affair partner from earlier that day), and an unknown donor. Kenny was excluded in all instances.

Here are the details of the results of the forensics testing.

*State of Michigan Department of State Police Forensic Science Division

LABORATORY REPORT

Here are summarized results from the *Conclusions* section of the Laboratory Report:

1. DNA Samples 397.03A1B3 (Semen A), 397.03A1B3 (Semen A), 397.03A1B3 (Semen A) (from fitted sheet samples) matches the DNA profile of the victim's husband. Kenny and John Doe are excluded as donors.
2. DNA Sample 397.03A1B1 (panty) revealed the major donor to be that of John Doe. The victim's husband was listed as a possible minor donor. Kenny is excluded.
3. DNA Sample 429.03A1A (Cigarette Butt) revealed the DNA source is **unknown donor**. The victim, victim's husband, John Doe, and Kenny are excluded as donors.
4. DNA Sample 429.03A15I1 (left middle finger under nail) revealed a match with the DNA profile of the **unknown donor**. The victim was listed as a minor donor. The victim's husband, Kenny, and John Doe are excluded.
5. DNA Sample 429.03A9D1 (Nylons, hip area) revealed matches with the DNA profile of the victim and the DNA profile of the **unknown donor**. The victim's husband, Kenny, and John Doe are excluded.
6. DNA Sample 429.03A9B1 (Nylons, ankle area) matches the DNA profile of the victim only. All others, including Kenny, were excluded.
7. DNA Sample 429.03A14D1 (Nylons, area near knot) matches the DNA profile of the victim only. All others, including Kenny, were excluded.

Excerpts found in the *Remarks* section of the Laboratory Report:

1. Upon submission of additional reference samples further comparisons can be made in order to determine the possible source of DNA types identified in samples 429.03A1A (Cigarette Butt), major donor to sample 429.03A15I1 (left middle finger under nail), and the minor donor to the non-sperm fraction of sample 429.03A9D1 (Nylons, hip area).
2. The DNA types identified from sample 429.03A1A have been entered into the casework database of the Combined DNA Index System (CODIS). You will be notified if a search of the database reveals an association.
